DETAILED ACTION

Response to Amendment

1. Applicants' amendment and remarks, filed May 19, 2006, has been made of record and entered. Claims 2, 4, & 12-16 have been canceled. Claims 3, 6, & 17 have been amended.

Claims 1, 3, 5-11, & 17-25 are currently pending and under consideration.

Terminal Disclaimer

2. The terminal disclaimer filed on 5/19/06 does not comply with 37 CFR 1.321(b) and/or (c) because: only 77% interest. A 100% interest is needed.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3, 5-11, & 17-25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 &

Art Unit: 1754

11-16 of copending Application No. 10/342,660 "copending '660". Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reason(s).

The major difference between the claimed catalyst and the catalyst of the copending '660, is that the catalyst of the copending '660 includes an additional "ruthenium" metal component, as a reducing species.

It would have been *prima facie obvious* to one of ordinary skill in the art at the time the invention was made to have added such known ruthenium metal component to the instant catalyst in order to make an improved and effective catalyst because "ruthenium" is known as useful catalytically active catalyst component.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102(b)

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3, 5-11, & 17-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Maier (US Pat. 6,121,187).

Maier discloses an amorphous mixed oxides, wherein at least 50% of said mixed oxides consists of one or a mixture of oxides of titanium, silicon, alumina or zirconium,

and up to 50% by weight of consists of one or more metal oxides selected from a group of elements including Sn, Hf, La, Ce, etc. and the claimed promoters, i.e., Fe, Co, Ni (see col. 14, claims 1 & 3). The mixed oxides additionally contains up to 5% by weight of at least one of the elements Pt, Rh, Ir, Os, Ru, Re, Ag, Au, Cu, Ni, Pd, Co in highly dispersed form in a metallic or non-metallic state (see col. 14, claim 4).

Regarding claims 1, 3, 5-6, 17-20, the disclosed noble metal and the first, second, and third metal oxides concentrations are falling within the claimed ranges (see above), thus the claims are met.

With respect to the claimed first, second, and third metal oxide mass ratio, it is inherent that the mass ratio of these metal oxides would be the same as being claimed in view of the same metal concentrations of these metal oxides disclosed above.

Regarding claims 7-11 & 21-25, the claims are met by the teaching of the reference in view of the teaching that the disclosed catalyst is suitable for used in various reactions including the claimed reactions (see Maier at col. 5, ln 41-67).

There is no patentable distinction seen between the claimed catalyst and that disclosed by Maier. Thus, the claims are anticipated by the reference.

Response to Arguments

7. Applicants' amendment/response filed on May 19, 2006 has been fully reconsidered, but not deemed persuasive in view of the new ground of rejection(s) above.

Conclusion

8. Claims 1, 3, 5-11, & 17-25 are pending. Claims 1, 3, 5-11, & 17-25 are rejected.

No claims are allowed.
